## N10

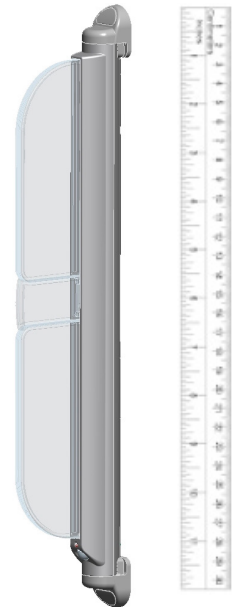

The compact design of the EVOLVE™ N10 makes installation possible in even the most confined areas. Whether it be a convenience store, staff room entrance, customer rest rooms or changing rooms, the small footprint and great performance help your stores deter, detect and displace shoplifters.

The EVOLVE™ N10 is an aesthetically pleasing antenna, designed to withstand tough retail environments with limited space, where traditional antennas just wouldn't be viable. The N10 can be fixed directly onto the wall by any entrance/exit, or in areas where space is at a premium.

Inside our N10 is our powerful EVOLVE™ electronics, providing your stores with market leading EAS detection performance, giving you the reassurance that your EAS Systems' investment is working for you when you need it.

- Compact EAS antenna, for smaller entrances/exits
- Backfield detection, allows for closer merchandising without false alarms
- Jammer detection, alerts stores to the use of EAS Jammers
- Flashing red LED, provides visual deterrent
- Simple to install and maintain
- Wall or floor mount
